

# MATH TUTORING FOR BRAIN RESEARCH

**Pre-Algebra, Algebra I, Algebra II, Geometry,  
Calculus**

We are a student-led non-profit group dedicated to helping support the research of Brian Aneurysms, which is one of the least-studied phenomena in the medical world. Our goal is to spread awareness of this disorder by using our math skills. Our tutors are academically gifted students at Pope High School, offering both group and individual sessions. In addition, our tutors, having previously taken these math courses, can better connect with your students in their studies. Our tutors can help with homework, test-taking strategies, and content related to their course.

**To book an appointment or request more information,  
email [tutorbeattumor@gmail.com](mailto:tutorbeattumor@gmail.com).**

**\$15 / Hour**

**100% of Profits  
Donated to Brian  
Research**

**Tutor's GPAs are top  
5% of their class**

**Wide Range of Math  
skills**

**Improves confidence  
in school**

**TUTORS BEATING  
TUMORS**
